JAGAN SUGUMARAN

Backend Developer | Java • Spring Boot • SQL | API-Driven Backend Development
Chengalpattu, Tamil Nadu, India

Summary

Backend developer building Java-based applications and REST APIs.

Experienced with Java, Spring Boot, SQL, and Linux, focusing on clean API design and database-backed services.

Worked on real backend systems through:
• A remote international backend internship using Java and NestJS
• TechAid finalist at Techfest IIT Bombay, contributing to accessibility-focused solutions

Comfortable owning backend features end-to-end and contributing to fast-moving teams.

Experience

AuthAction
Intern
May 2025 - June 2025 (2 months)
Munich, Bavaria, Germany

Intern – Backend Development

Tech stack: Java, NestJS

- Built and tested backend APIs using Java and NestJS
- Worked on authentication and backend service logic
- Collaborated remotely with an international team
- Followed clean code practices and API documentation standards

CodSoft
Intern
June 2024 - July 2024 (2 months)

Intern – Java Development

• Developed Java-based applications including a guessing game, grade calculator, and ATM interface
• Implemented core logic, user interaction, and validation
• Gained hands-on experience with Java fundamentals and Swing
• Version-controlled projects using Git and GitHub

Education

University College of Engineering Tindivanam

Bachelor's degree, Computer Science · (October 2022 - December 2026)
